Acronis®

ACRONIS® BACKUP

FOR VMWARE®

BEST BACKUP FOR VMWARE® VSPHERE®

Restore 100X Faster with vmFlashBack™!

What is your tolerance for downtime: One day? One hour? Maybe you have zero tolerance for downtime, but don't have the time or resources to perform backup and recovery of your virtual machines. Acronis has the answer.

Acronis Backup for VMware is the fastest, easiest and most complete backup and replication solution available on the market today. It's your ally against downtime and takes just minutes to install. You can immediately create images of your virtual machines and back up the ESXi host to enable bare metal recovery. The state-of-the-art vmFlashBack technology securely brings your virtual servers back to life 100 times faster than a full recovery.

Benefits:

- Agentless VM backup
- ESXi host backup

- Unlimited VM migrations
- Granular file recovery

ACRONIS BACKUP FOR VMWARE® IS THE BEST BACKUP AND REPLICATION SOLUTION

Most complete backup and disaster recovery solution for VMware®

Acronis Backup for VMware provides backup and replication of virtual machines and recovery of entire ESXi servers. It fully supports Microsoft® Exchange Server, SQL Server®, SharePoint®, Active Directory® and other applications. You can easily extract individual items or files from Exchange or SharePoint backups.

Fastest recovery for less downtime

By running a virtual machine directly from a mounted image you gain near-instantaneous recovery, and the Acronis vmFlashBack technology recovers virtual machines 100 times faster than a full recovery.

Widest array of backup destinations

Acronis Backup for VMware provides backups to local disks, network shares, ESXi datastore, and the Cloud to optimize storage.

Easy to install, use and manage

You can install and configure Acronis Backup for VMware in minutes, then manage backups directly from vCenter™ or a Web console using supported browsers.

Unlimited migrations

Acronis Backup for VMware allows you to perform unlimited migrations of physical or virtual servers to VMware vSphere®.

KEY FEATURES

- **Installs in minutes**, as either a virtual appliance or on a dedicated machine.

- **Agentless backup** of virtual machines with VADP.

- **New! Centralized dashboard** allows monitoring and managing backups in large or highly distributed environments from a single page.

- **Full integration into VMware vCenter** enables you to centrally manage all backup, recovery and replication operations directly from vCenter.

- **Staging/Multi-destination** - move or copy newly created backups to another location.

- **Replication of virtual machines** onto another host for additional protection and fast recovery in the event of a disaster.

- **vmFlashBack** copies only blocks that have been changed after a backup, making the restore process 100 times faster.

- **Run a virtual machine from its backup** without having to do a full restore.

- **Bare metal recovery of an entire VMware ESXi host** – including the binaries for the VMware vSphere hypervisor, configuration settings, and all virtual machines managed by the hypervisor – to the same machine or a different bare metal machine.

- **New! Configuration restore** - all configurations, including tasks and settings, can be exported to a file and imported to the same, or any other vmProtect installation.

- **New! Application support** ensures consistent and reliable protection of Microsoft SQL Server, SharePoint and Active Directory data.

- **Recover an entire Microsoft Exchange Server database** or individual items, such as mailboxes, emails and contacts, from a virtual machine backup.

- **Automatic disaster recovery plan helps you to respond quickly and includes** step-by-step instructions.

- **Compression, built-in deduplication** and 256-bit data **encryption.**

- **Seamless integration with Acronis Cloud storage** for an extra layer of data protection.

REQUIREMENTS

Acronis Backup for VMware® can back up and recover virtual machines running on:

- VMware vSphere® 5.1, 5.0, 4.1, and 4.0.
- Application-aware backup and recovery is supported for:
    - Microsoft® Exchange Server 2013, 2010, 2007, or 2003 SP2+
    - Microsoft SQL Server® 2012, 2008 or 2005
    - Microsoft SharePoint® 2013, 2010 SP1, 2007 SP2, 3.0 SP2
    - Microsoft Active Directory® domain controllers running on Windows 2012, 2008 or 2003.

- VMware® ESX® and VMware® ESXi™ hypervisors are supported except for the free version. Additional information is available at the Acronis® Knowledge Base: http://kb.acronis.com/content/44011
- Virtual machines can run any guest operating system supported by VMware vSphere.

Bare Metal Recovery is supported for VMware ESXi, but is not available not for VMware ESX.
